

1. **Requested by** (first and last name):
2. **Email:**
3. **Requested forms and time periods** (all available visits or last visit):
4. **Exclusion/ inclusion criteria** (for example – patients born in 2009, or patients with certain diagnosis; remember to specify the form and variable that defines the criterion)
5. **How to connect the forms together?** (for example - personnummer and visit year?)
6. **New variables to create** (for example – mean, minimum or max, age if date available, gender from Personnummer, etc...):
7. **What is your aim/goal:**
8. **Other:**

**Note:** For each form listed in 3. you need to select the variables you are interested in from an excel file (filename = form name). For selected variables please type "1" in the column named "Include\_report".

Columns "FormObjectName" and "PromtOnSearch" match the data selection from "Sök poster" in 3C (the order is also almost the same).
